1. Executive Summary

- ▶ Nike Website Marketplace is a cutting-edge e-commerce platform offering a seamless shopping experience for Nike enthusiasts. Built using Next.js, Sanity CMS, and API integrations, it ensures dynamic product updates, fast performance, and a user-friendly interface. Our goal is to revolutionize the online shopping experience by providing an exclusive range of Nike products with a modern, intuitive, and scalable marketplace.
- 

2. Problem Statement

Traditional online marketplaces often suffer from:

- Limited customization for brand-focused marketplaces.
- Slower product updates and inefficient data management.
- Poor search functionalities, making product discovery difficult.
- Lack of engaging user experiences and real-time product availability updates.
- Limited stock availability in physical stores, making it difficult for customers to find their desired products.
- The presence of local and fake products, leading to trust issues among customers.

3. Solution

Nike Website Marketplace addresses these issues by:

- Offering a fully customizable, brand-specific shopping experience.
- Implementing Sanity CMS for real-time product updates and seamless API integrations.
- Introducing an advanced search and filter system for easy product discovery.
- Utilizing Next.js for optimal performance, SEO, and fast load times.
- Providing a reliable and authentic Nike shopping destination where customers can find 100% genuine products.
- Offering a vast online inventory to overcome stock limitations faced in physical stores, ensuring customers can always find their desired Nike products.

4. Market Opportunity
